

# ANDROID DEVICE MANAGER

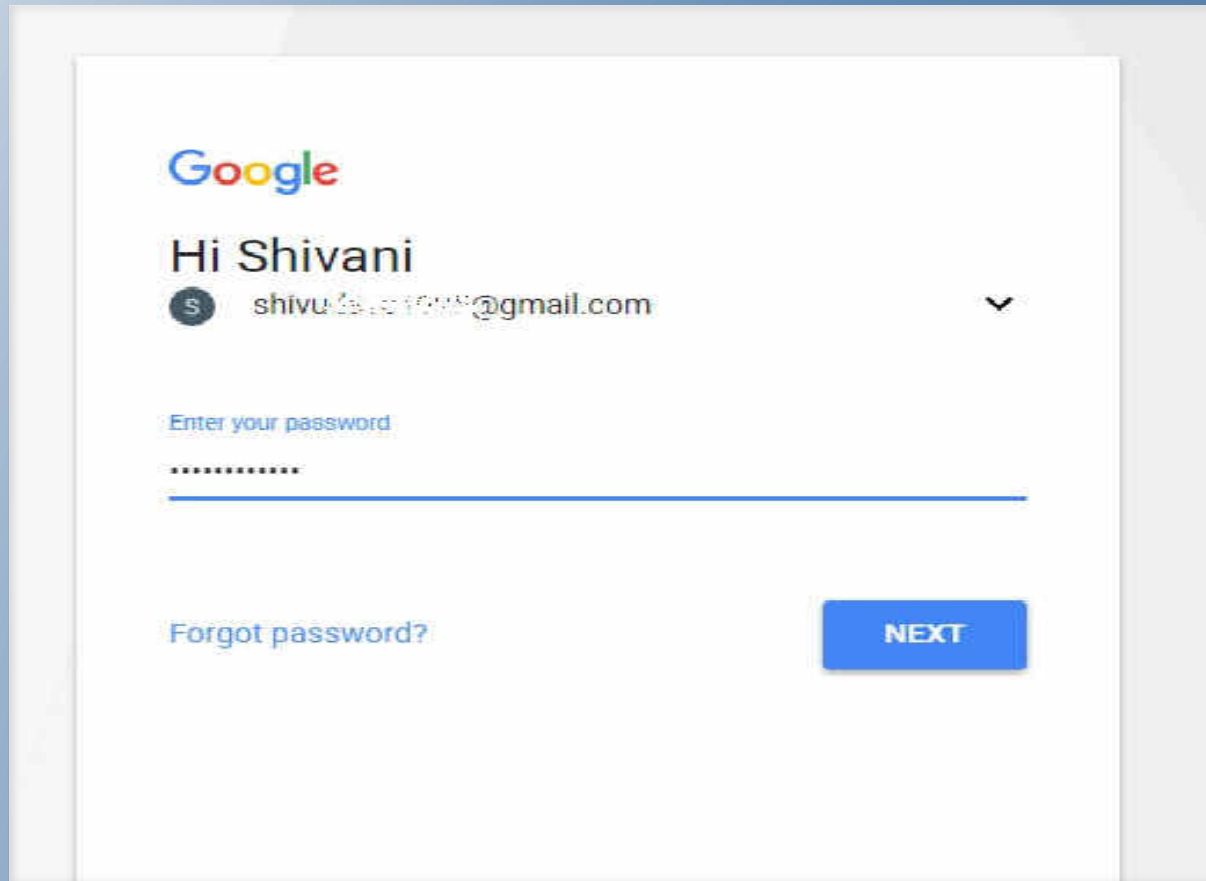

---

# INTRODUCTION

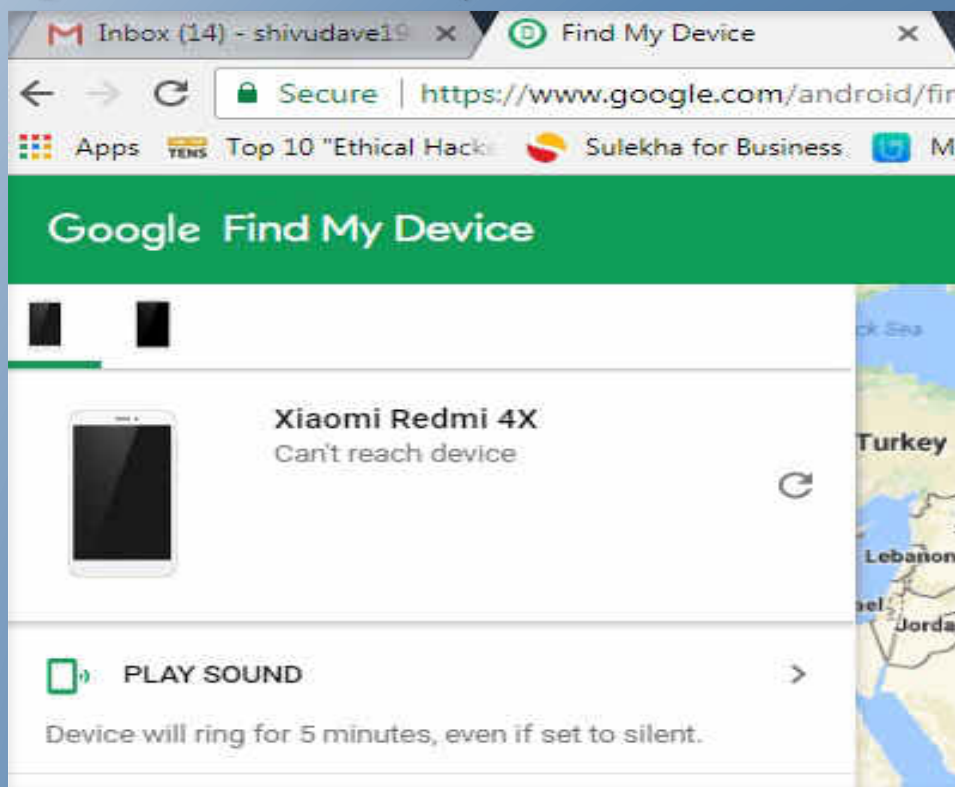

Android device manager locates the lost phone and helps you to keep your data safe and secure..

1. Log in to your Gmail account which is been activated in your phone.

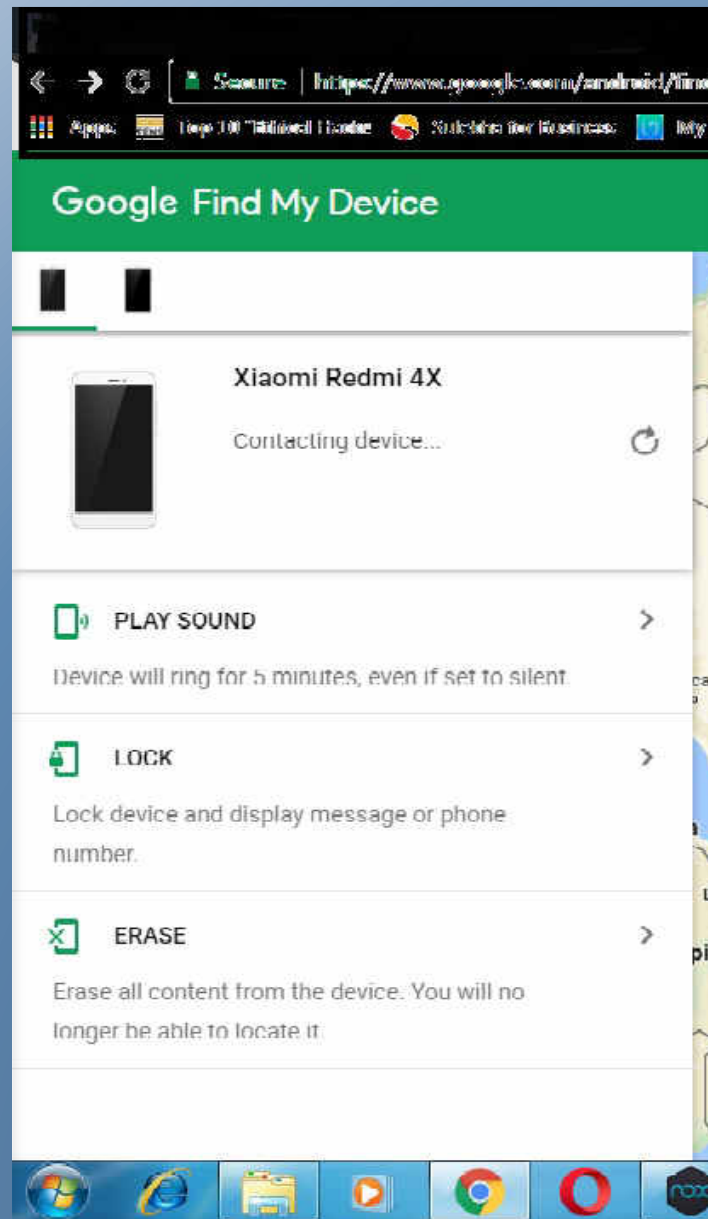

A screenshot of the Gmail login page. At the top is the Google logo. Below it, the text 'Hi Shivani' is displayed. Underneath is a profile picture placeholder (a circle with an 'S') and the email address 'shivani.singh@gmail.com'. To the right of the email is a small downward arrow. Below this is a password field with the placeholder text 'Enter your password' and a series of dots representing the password. At the bottom left is a link 'Forgot password?'. At the bottom right is a blue button labeled 'NEXT'.

- Open a new tab → Google search → Android Device Manager → Find my device.

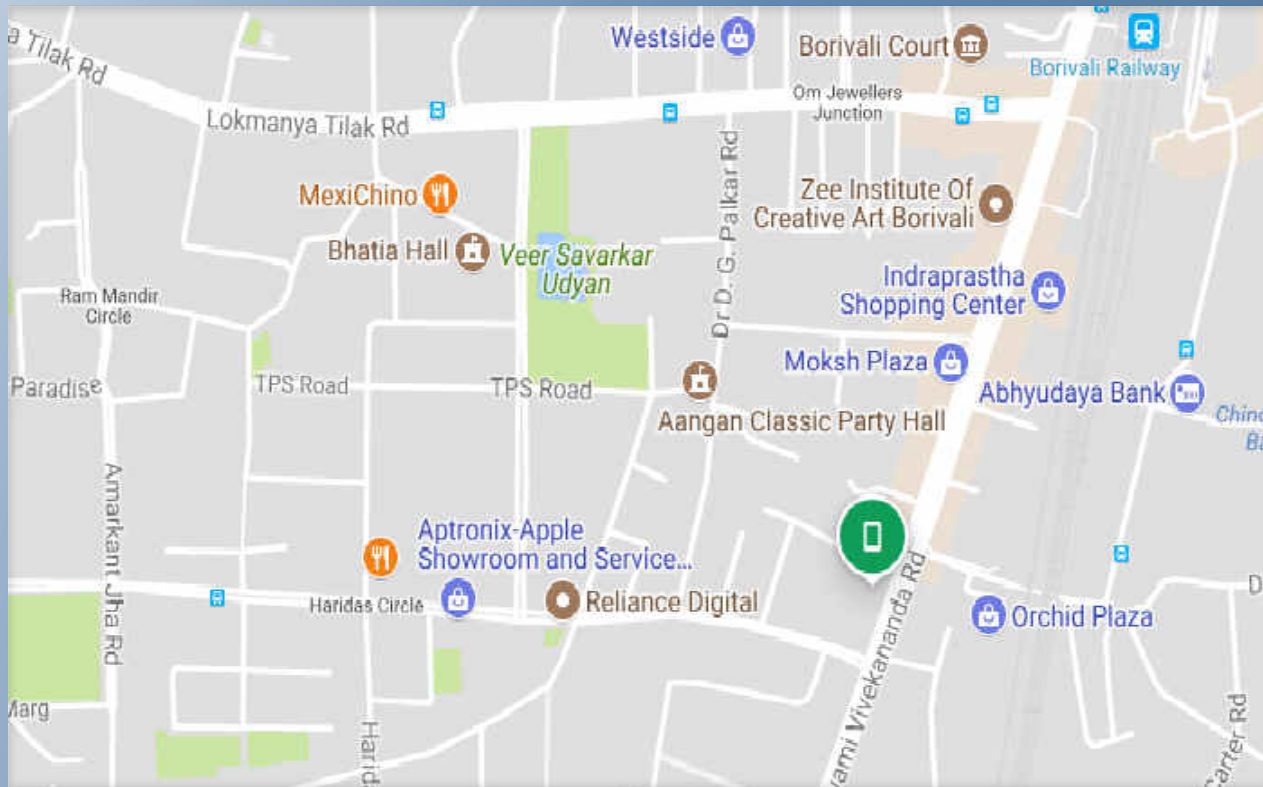

# ADM lets you to

- Ring your phone
- Lock your phone
- Erase phone's data.

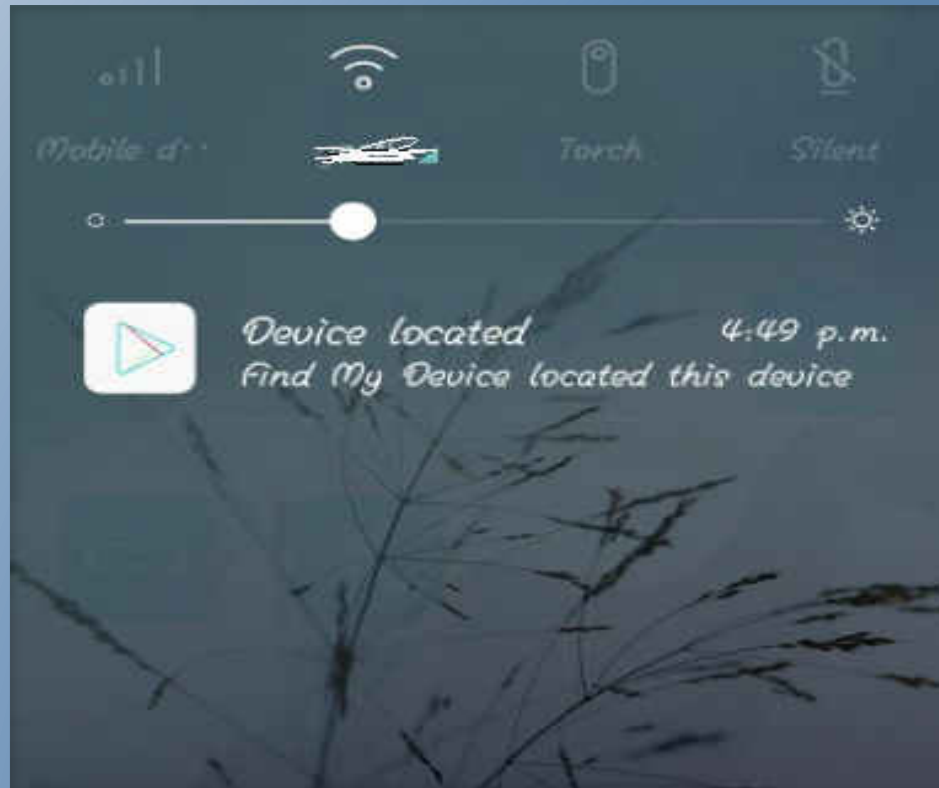

## 5. Locating device on map – Phone can be located only if your phone location is on.

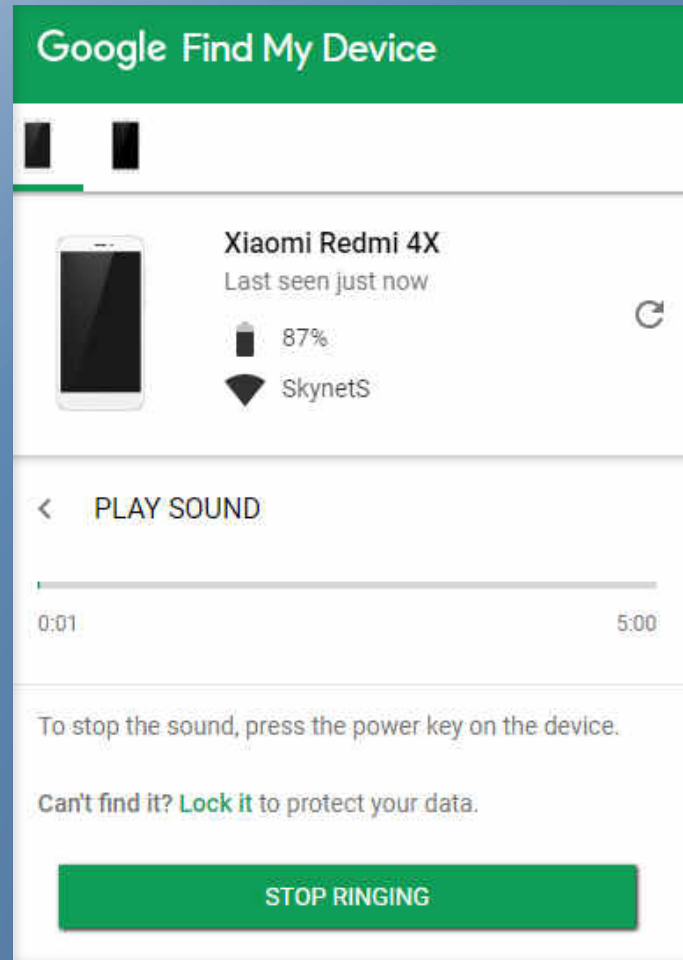

## Notification on the device

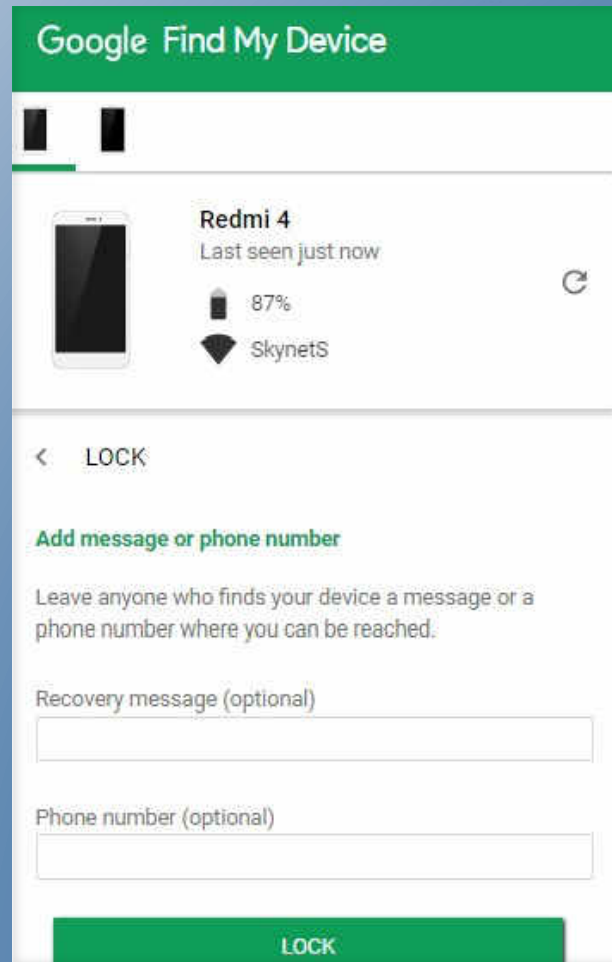

2. Ring your phone – You can ring your phone even if it is on silent mode.

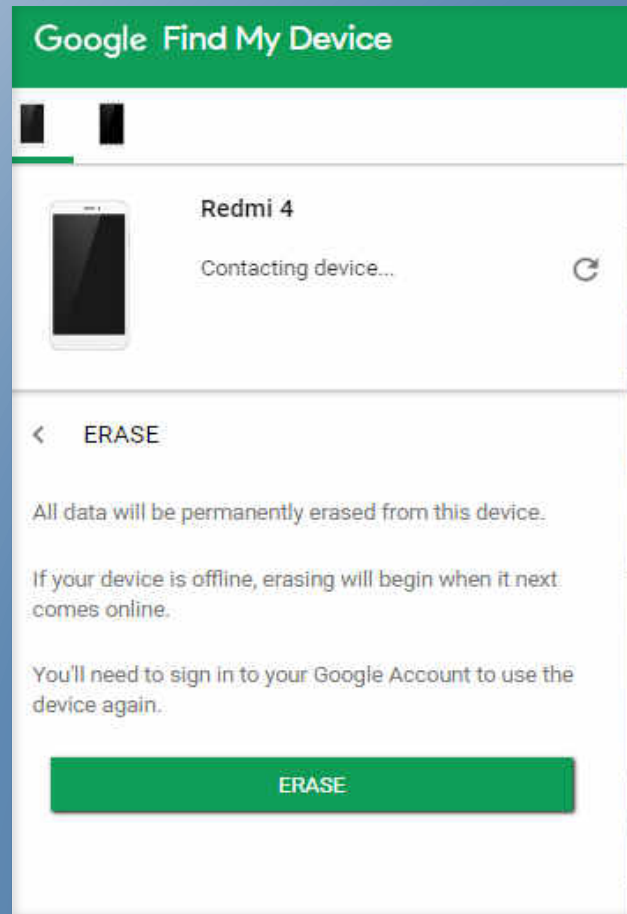

3.Lock your phone – You can lock your phone and leave message or a phone number where you can b reached.

A screenshot of the Google Find My Device web interface. The top bar is green with the text 'Google Find My Device'. Below it, there are two device icons. The main section shows a 'Redmi 4' device with a status of 'Last seen just now', 87% battery, and 'SkynetS' network. Below this, there is a 'LOCK' button. Underneath, there is a section titled 'Add message or phone number' with a description: 'Leave anyone who finds your device a message or a phone number where you can be reached.' There are two input fields: 'Recovery message (optional)' and 'Phone number (optional)'. At the bottom, there is a green 'LOCK' button.

## 4. Erase phone's data – Data will be permanently erased from your phone.

Thank you..!! 😊
